

NOVATION ENHANCES ONLINE CONTRACT CATALOG

Novation has released the first in a series of enhancements to its online contract catalog in order to help hospitals maximize supply chain management efficiency. These enhancements are intended to improve speed or ease of use and accuracy of search functionality. Novation also added the United Nations Standard Products and Services Code (UNSPSC) category to the product search. Additional improvements to the catalog will focus on enhancing the tiered pricing functionality and integrating into hospital information systems.
