## CDC Releases New Videos on Injection Practices

As part of International Infection Prevention Week, the Centers for Disease Control and Protection has released [two new videos](#) to help healthcare providers unsafe injections practices, which can infection outbreaks. The videos are part of the CDC's [One and Only Campaign](#) to make healthcare safer one injections at a time.

Created by the [Safe Injection Practices Coalition](#), these videos detail critical information to help all providers and facility managers double check their injection safety knowledge and help keep patients safe from unnecessary harm.

## CDC Begins Publishing Weekly FluView Report

The CDC is now publishing its weekly [FluView](#) report for the 2014-2015 influenza season – an important reminder to ramp up awareness and vaccination efforts.

The CDC also is offering a weekly *FluView Interactive* [report](#) that provides weekly influenza surveillance information in the United States. The applications in the interactive report enhance the weekly *FluView* report by better facilitating communication about influenza with the public health community, clinicians, scientists and the general public.

The timing of flu [seasons](#) can vary but activity usually begins to increase in October. The CDC recommends an annual [flu vaccine](#) for everyone 6 months of age and older and especially for healthcare providers.

Check out the latest information on the 2014-2015 flu season via NJHA's Seasonal Influenza [Web page](#)
