Energy Cost Recovery in Today's Complex Arena
[Complimentary Webinar](#)
Thursday, October 27 @ 2 pm

NJHA and Strategic Partner MedGap Solutions will present an energy cost recovery webinar on [October 27 at 2pm](#) with NuEnergen, a leading expert in energy management and consulting services.

NuEnergen will discuss the no risk opportunity to recover historical billing errors and reduce payments for future gas and electric bills. The NuEnergen process goes well beyond traditional energy bill audits and forensically examines the complex matrix of utility rate structures and tariffs to uncover errors, recover funds on your behalf and provide a mechanism to assure future bills will be calculated correctly.

Learn about NuEnergen's proprietary modeling process and analytic capabilities as well as strategies to minimize future energy costs through the application of demand response programs including examples of business value creation with other healthcare institutions in the region. NuEnergen can also provide guidance on future energy consumption, budgeting and energy sourcing strategy development...addressing a cost center that continues to become more complex over time.

Med Gap Solutions partners will also provide an energy market update and highlight opportunities for New Jersey hospitals and healthcare facilities.
