Overall Effect for Reducing Healthcare Disparities Within
Your Healthcare System***

Webinar

Tuesday, December 6 @ 2 p.m.

NJHA Strategic Partner Language Access Network (LAN) is hosting an informative webinar on December 6 at 2 p.m. that focuses on telemedicine.

Integrating Telemedicine into your daily practice can yield significant benefits such as: improved outcomes, better quality and enhanced efficiency at a lower cost. Learn how your hospital can be both a consumer and provider of telemedicine services while incorporating all your specialties on a single platform, including language interpretation services.

Presented by James “Jamey” Bradley Edwards, Chief Executive Officer & Chairman of the Board of Cloudbreak Health, LLC. As CEO of Cloudbreak Health (“Cloudbreak”), Jamey is on a mission to #HumanizeHealthcare. Cloudbreak is a healthcare solutions innovator that was formed by bringing together two companies: Language Access Network, a pioneer of Video Medical Interpreting, and Carenection, the world’s first true telehealth marketplace and the first unified telehealth platform. The platform is delivering over 1 million encounters per year to healthcare facilities nationwide over the Carenection Telehealth Delivery Network, a private path broadband network optimized for secure and high quality healthcare collaboration.
