## ***Building Your Information Security Management Program Roadmap*** **WEBINAR | Thursday, April 13 @ 11:00am**

Information security issues threaten the vision and value healthcare organizations hold, as well as their public perception, compliance and profitability. One of the key steps to ensuring an organization can prepare for and react to these threats is to establish an Information Security Management Program (ISMP) roadmap.

A well-organized, prioritized and systematic approach to addressing your organization's cybersecurity risks is key to robust security management and addressing board leadership concerns.

This webinar will highlight the best practices for building an ISMP roadmap tailored to your culture and budget. Utilizing the "CARVER" process, we'll focus on top cybersecurity priorities while leveraging organizational and IT strengths.

BluePrint Healthcare IT's cybersecurity experts will be joined by Joe Carr, NJHA's CIO. Together, they will outline steps that you can take to build a customized ISMP roadmap in less than one day.

This webinar will enable you to:

1. Conduct a gap analysis of the ISMP roadmap
2. Build a Gantt Chart view of the ISMP roadmap
3. Utilize the CARVER framework to define overall priorities
4. Pinpoint key adjustments in the planning process
