

Biocentris Pharmaceuticals Improves Hand Hygiene Market
[Webinar: March 22 @ 2PM](#)

NJHA New Strategic Partner Biocentris Pharmaceuticals takes hand hygiene seriously by focusing only on hand hygiene! Biocentris researches, develops and markets advanced infection prevention and skin care products for healthcare that are aesthetically pleasant and can be used repeatedly without buildup and skin irritation.

All R&D efforts are based on novel cationic chemistry to create highly efficacious products that are *skin friendly enough to be used hundreds of times per day without adverse effects*. Products are manufactured in New Jersey in an FDA registered and inspected plant and are compliant with the current FDA monograph for healthcare antiseptic drug products.

Biocentris offers product system compatibility, alcohol and alcohol-free products and the latest in dispenser technology with optional hand hygiene monitoring systems in order to meet any and all infection prevention needs of health care facilities.

Join us on March 22 at 2 pm for an exclusive webinar — **[The Art and Science of Advanced Hand Hygiene Product Systems](#)**. Learn more about the Biocentris product line and why better formulation matters by giving the best immediate and persistent antimicrobial efficacy.

- 1) ICS3 blue antiseptic foam hand rub
 - contains 72% ethyl alcohol active
 - Formulated with advanced emollients and irritation mitigators
 - Instant broad spectrum activity
- 2) ICS3 pink healthcare foam antiseptic handwash
 - Contains 0.13% benzalkonium chloride active
 - High antimicrobial efficacy comparable to 2% CHG
 - Exceptionally mild due to multifunctional skin care components
