

**NES Employee Benefits: Recruitment and Retention Secret Weapons
Webinar
January 25 @ 11 AM**

Join NJHA and National Enrollment Services (NES) on [January 25 at 11 AM](#) and learn how to help your employees recover “found money” from the government, helping enhance workforce retention. NES will introduce and explain the Earned Income Tax Credit (EITC) and how NES can help your front line staff determine if they qualify and how they can claim this money from the government.

After servicing hundreds of healthcare facilities across the country, NES finds that many front line staff (aides, dietary and housekeeping) have not recovered this valuable money from the government.

NES will also go over the various voluntary benefits it offers, so you can see how these plans can help your employees address their financial concerns and ultimately help lower worker’s compensation rates.

At the conclusion of this webinar, you will have a clear understanding of the NES program offerings that benefit your employees, promote workforce retention and how easy it is to offer these solutions within your organization.
