### **OVERVIEW:**

The effects of opioid misuse and overdose have become a national epidemic. Addressing this urgent problem requires a multi-pronged approach to achieve improvement. Hospitals can help to achieve the goal of reducing harm from opioid medications through strategic opioid stewardship programs. Join the New Jersey Hospital Improvement Innovation Network (NJHIIN) for this opioid stewardship workshop to learn how your organization can take an interdisciplinary approach to improve opioid-related outcomes.

### **OBJECTIVES:**

- Identify initiatives an opioid stewardship team can undertake to improve safe opioid use and harm reduction
- Discuss the design of an opioid bridge clinic program in an emergency department
- Identify components of a multi-model pain management program in the perioperative setting
- Describe opioid use-related quality improvement actions in the outpatient physician practice setting
- Understand the impact of opioid use from a patient perspective.

### **LEARNER OUTCOME:**

After successfully completing the course, the learner will identify two initiatives an opioid stewardship team can undertake to improve safe opioid use and harm reduction, transferrable to their organization.

Successful completion of the course is defined as in-person attendance for 95 percent of the didactic learning session and a complete course evaluation.

### **TARGET AUDIENCE:**

Physicians, hospital-based nurses, quality improvement staff, pharmacists.
