

#ScanSmart

There are ways to work with the medical team to ensure your child is exposed to the smallest amount of radiation possible.

Stay **COOL** and ask questions.

- C**onsider using other testing (without radiation) when appropriate
- O**nly image the indicated area
- O**nly scan once
- L**owest amount of radiation based on child's size (child-dosing) should be administered

Parents are their child's best advocate.

Make sure a CT scan is necessary before agreeing to the procedure.
