# Financial Status of New Jersey Hospitals: 2012 Edition

---

SPONSORED BY: NJHA's Health Economics Department

---

The comparative financial data contained in the annual Financial Status of New Jersey Hospitals report has been condensed from hospital audited financial statements. The consolidated data and ratios are trended over two- and five-year periods, which has proven useful in the past to member hospitals and others for performing comparative analysis in management planning or for making financing decisions.

This Financial Status report can be used to assess and evaluate the current financial health of New Jersey hospitals, for both acute care hospitals and non-acute specialized and rehabilitation hospitals. The specific data contained in this report provides authoritative and reliable information to legislators, regulators, healthcare industry analysts and others who require a thorough understanding of the current financial status of New Jersey hospitals.

A great deal of care has gone into the abstracting, controlling and reporting of the hospital audited financial information contained in this report in order to encourage and facilitate the industry's reliance on, and use of, the findings of this publication.
