

Implementing the **AIM Patient Safety Bundles:** **Care for Pregnant and Postpartum People with** **Substance Use Disorder**

These offerings are part of a series of educational opportunities for clinicians and care team leadership engaged in the priorities of the New Jersey Perinatal Quality Collaborative's support of hospitals' efforts to implement the AIM patient safety bundle focused on caring for pregnant and postpartum people with substance use disorder.

These important courses are complimentary, thanks to funding support from the Centers for Disease Control and Prevention through the N.J. Perinatal Quality Collaborative. Credits are provided for continuing medical education and continuing nursing education.
